Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The invention relates to a roulette table device with progressive jackpot.
2. Document **D1: WO-A1-02/40118** is considered to represent the most relevant state of the art and discloses (the references in parentheses applying to this document):
A roulette table device with progressive jackpot (see claim 1 and fig. 3).
3. From this document the present application distinguishes itself in that a detection area is provided on a gaming table of the device, for detection the movement of a so-called dolly in the detection area (cf. pg. 2 ln. 32-35).
4. Although Document **D2: US-A-5683084** discloses a casino dolly for use in a roulette game, this detects the presence of a hand or movement of chips in an area around the dolly but not the movement of the dolly itself.
Therefor a combination between these two prior art documents is not possible since a skilled person in the art would not arrive at the same roulette table as the one defined in the present independent **claim 1**.
5. Since none of the other available prior art document discloses such a roulette table as in the independent **claim 1**, it is considered that this claim fulfils the requirements of the ARTICLE 33(2) AND (3) PCT in view of novelty, inventive step and industrial applicability.
6. The remaining dependent claims 2-11 also meet the requirements of the PCT.
